

CLOUD SERVICES

CHART A CLEAR, SECURE PATH TO THE CLOUD WITH PHARICODE

Pharicode's robust team of Cloud Architects and Engineers is committed to modernizing and advancing your technology investments. Federal customers have complex cloud migration and hosting needs. Our team is experienced in navigating the complexities associated with these environments and providing secure, scalable, and redundant cloud-based solutions for our customers. Our ability to efficiently migrate legacy systems and applications to the cloud allows our customers to stay focused on their business needs and quickly realize the benefits of cloud services.

BENEFITS OF CLOUD HOSTING

Secure Systems for Highly Regulated Industries

Leveraging our Managed Services and Security Stack, Pharicode provides cloud services that comply with the DoD Cloud Security Requirements Guide for Impact Level 5 (IL5) computing. Our team of experts ensures that your cloud solutions are built to align with necessary IT policies and regulatory requirements.

Save Money & Resources

Our team of professionals is prepared to do the work, allowing your organization to stay focused on their core responsibilities.

Modernize & Continuously Evolve

With a focus on continual improvement, our team enables our customers to take advantage of new technologies, pre-designing business automation and workflows that capitalize on task-based service-oriented architecture to quickly yield improvements.
